Professional Summary

Dedicated Automation Test Engineer with over 3.6 years of experience in Selenium Web-Driver, SQL, UNIX, and performance testing using JMeter. Specialized in the Investment Banking domain with a demonstrated ability to enhance efficiency by 30% within 6 months. Proficient in Agile methodologies and defect management, dedicated to delivering high-quality outcomes in fast-paced environments.

WORK EXPERIENCE

Capgemini Technology Services India Limited

Pune 08/2021 – Present

The Company provides customized and packaged application development, application maintenance outsourcing, business intelligence services and application re-engineering through large offshore development centers

Automation Test Engineer•Full-time

- Scrum & Agile : Participated in daily Scrum meetings, provided weekly status reports, implemented Agile processes.
- Sprint Backlog: Analyzed user stories; designed and executed cases for effective project management.
- Functional-Testing: Executes both manual and automated processes using Selenium Web-Driver to ensure high-quality outcomes.
- Led the automation initiative, achieving a 40% reduction in manual efforts, resulting in faster release cycles and enhanced efficiency.
- Programming Skills: Applies Java expertise, leveraging a strong understanding of OOP concepts and data structures for effective software development.
- Identified and resolved 95% of web elements using XPath, iFrame, POM, and handling popups and list boxes, resulting in improved test automation accuracy and efficiency.
- Cross-Browser Testing: Ensured consistent application functionality across Internet Explorer, Firefox, and Chrome.
- Synchronization: Proficient in utilizing implicit, explicit, and fluent waits to optimize test execution and stability..
- Unit Testing: Expertise in JUnit, TestNG, BDD, and Cucumber, facilitating the execution of hundreds of unit tests to enhance code quality.
- Enhanced efficiency by 30% through the use of SQL, UNIX, JIRA, Maven, GitHub, and Jenkins, reducing overall execution time and boosting release frequency.
- Defect Management: Identified and reported defects; facilitated test results reviews to ensure quality and continuous improvement.
- Performance Testing: Utilized JMeter for 2 years to conduct extensive performance and load testing, ensuring system reliability and scalability.

- API Testing: Leveraged Postman and SOAP UI to conduct over 100 API tests, ensuring robust performance and reliability.
- Selenium Automation: Created robust scripts for web applications, enhancing efficiency and accuracy.
- Communication & Leadership: Excellent communication with team and clients; adept at mentoring and guiding new team members.
